

SLIM PROFILE DOUBLE BRACKETS

TWO BLINDS /
ONE COMPACT SOLUTION /

Acmeda's revamped slim combo brackets offer a more rectangular slimline dual bracket design. From as little as 85mm wide and 148mm long, the brackets are available in two convenient options. The top front bracket allows for the upper most blind to be front rolled creating a fabric pelmet, while the top back offers the conventional dual back rolled blinds, both on one convenient and slim bracket solution.

FEATURING:

- Slim compacted profile.
- Allows for chain & motorised controls.
- Universal installation.
- Longer fixing plates for easier installation and increased strength.
- Chain winder guide avoiding chain interference.
- Two convenient options offering same side left or right hand controls.

Not applicable with
22mm round weight bar
