SUN CONTROL BY RICKY

Australia is blessed with beautiful weather, but it comes at a price. With some of the highest rates of UV exposure and unfortunately skin cancer, it is vital that businesses and homes do what they can to minimise their risk by maximising their sun protection.

At Ricky Richards, we are passionate about sun protection. We supply only the highest quality sun control fabrics, to protect people from the sun. While doing this Ricky also has an active donation program which contributes to research by the world leading Melanoma Institute Australia.

Our range of outdoor blind fabrics are UV treated allowing them to last a long time while limiting your direct sun exposure. Navigate your way through our wide range of options and find the perfect fabric for your project and budget.

Our sun control products will help minimise unwanted solar heat gain and glare thus improving energy efficiency for your home as well as the work environment.

Aside from the many beneficial and functional attributes of our Sun Control products, they also look great! You will be sure to find a fantastic option for your project.

OUR SUN CONTROL RANGES INCLUDE: DOCRIL, DOCRIL GARDEN, OUTLOOK AND BARRINGTON.

MELANOMA INSTITUTE AUSTRALIA

Melanoma Institute Australia is a non-profit, non-government Australian organisation dedicated to preventing and curing melanoma by pioneering advances in research and treatment that are making a difference to the lives of patients today.

Australia has the highest incidence of melanoma in the world. On average, 30 Australians will be diagnosed with melanoma every day and more than 1,200 will die from the disease each year.

Ricky Richards is paving the way to a future where melanoma can be cured through a corporate social responsibility partnership with Melanoma Institute Australia.

The partnership began in July 2015 with Ricky Richards donating a percentage of sales from various sun control product lines directly to Melanoma Institute Australia to fund a fellowship position.

CEO of Melanoma Institute Australia, Carole Renouf, says the research that results from fellowship positions, such as the one funded by Ricky Richards, is the “only way we can address all of the questions posed by melanoma”.

“There is still so much we don’t know about melanoma and it affects so many Australians... the ongoing support and generosity of our corporate partners is crucial to our goal of a future where there will be no more death from melanoma.

“People reduce their risks, at the individual level, by being sun-smart but, as a community, we must invest in research into treatment and early detection.”

“This is a disease that can often, but not always, be prevented. One in 14 Australian men and one in 24 Australian women are likely to be affected at some point in their lives. Melanoma will touch us all.”

“People reduce their risks, at the individual level, by being sun-smart but, as a community, we must invest in research into treatment and early detection,” Ms. Renouf says.

Thus far Ricky Richards has raised more than \$200,000 for the Institute and remains committed to the search for a melanoma cure.

Ricky Richards’ sun control fabrics were developed to support Australian families with outdoor living, by providing shelter and protection from the sun’s harmful rays. These fabrics when installed appropriately will block and reflect a percentage of damaging UV rays. However, to protect skin from indirect UV rays, we recommend that personal sun protection, including clothing and sunscreen, still be used.

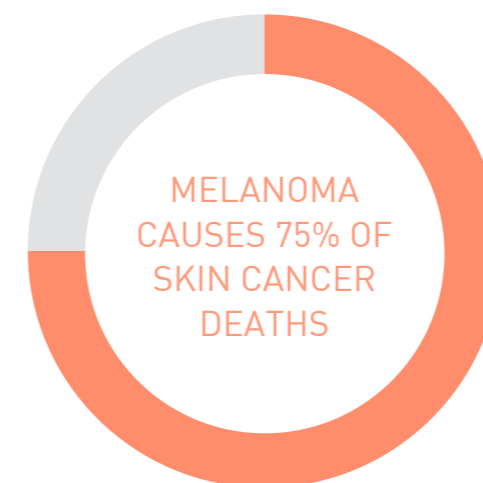

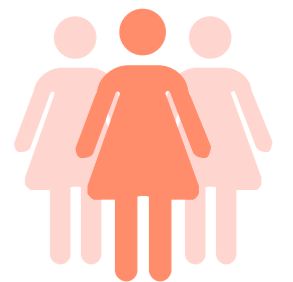

Sun protection and minimising sun exposure are **the keys to prevention of melanoma.**

Australia and New Zealand have the highest melanoma rates in the world

In Australia, 1 in 14 men and 1 in 24 women will be diagnosed with melanoma sometime in their life

One person every five hours will die from melanoma in Australia.

The best way to prevent melanoma is to protect your skin from the sun.

WHY DOCRIL?

Australian tradition meets European style. Docril fabrics allow your domestic or commercial indoor design to flow through your windows and outdoor living areas with elegant beauty.

DOCRIL FABRICS:

- Reduce solar heat gain by up to 90%
- Provide protection from the sun helping reduce solar energy bills
- Provide outdoor comfort and indoor climate control
- Stylish, durable and easy to clean
- 100% solution dyed acrylic fabric ensures long lasting colour
- Colours & Designs are water resistant, while Nautica fabrics are waterproof
- Increase commercial profits by creating a useable outdoor dining space
- Expand and shelter outdoor living spaces

Docril fabrics by Citel are Oeko-Tex® Standard 100 certified and have been tested for harmful substances or chemicals which are prohibited or regulated by law. The Oeko-Tex® Standard 100 is a globally uniform testing and certification system.

Docril fabrics are coated with Dupont Teflon and have exceptional resistance to water, high temperatures, chemical reaction, corrosion and stress-cracking.

Docril fabrics are as durable as they are stylish and are designed to handle high traffic applications with ease. In outdoor situations these fabrics should be hosed regularly to remove dust, bird droppings and other solid particles and should not be rolled up or stowed away while wet.

Docril fabrics are supported by a 10 year warranty. This covers changes in physical properties and is valid for 10 years from the date of purchase. Further details about this warranty are available by request from Ricky Richards (Sales) P/L.

A percentage of the proceeds of the sale of all Docril fabrics will be donated to Melanoma Institute Australia. By choosing a fabric from this collection, you will be supporting melanoma research.

DOCRIL DESIGNS

OUTLOOK

PVC MESH

WHY OUTLOOK

For sun control, cool breezes and uninterrupted views, the Outlook Collection of fabrics from Ricky Richards are your optimum window covering solution.

OUTLOOK AND MODE FABRICS:

- Reduce solar heat gain by up to 99%
- Protect from the sun while you still enjoy your outside view
- Provide outdoor comfort and indoor climate control
- Allow light and cool breezes to filter through
- Exceptional resistance to harsh weather conditions
- Expand and shelter outdoor living spaces

Outlook and Mode fabrics are supported by a 10 year warranty. This covers changes in physical properties and is valid for 10 years from the date of purchase. Further details about this warranty are available by request from Ricky Richards (Sales) P/L.

Phifer uniquely combines the performance of Outlook and Mode fabrics with Microban® antimicrobial technology to provide continuous product protection against stain-causing bacteria, mould and mildew.

Mode fabrics manufactured by Phifer Incorporated are GREENGUARD® Gold Indoor Air Quality Certified by the GREENGUARD® Gold Environmental Institute (USA) under the GREENGUARD® Gold standard for Low Emitting Products. As Mode fabrics can be used for interior window coverings, they have been tested and certified as low chemical-emitting products.

Mode fabrics have been tested to AS1530.3 – 1999. Mode fabrics are manufactured by Phifer Incorporated. Independent laboratory test reports are available by request from Ricky Richards (Sales) P/L.

Outlook and Mode fabrics are as durable as they are stylish and are designed to handle high traffic applications with ease. These fabrics are easy to maintain and require only occasional cleaning using a mild detergent, brushing and rinsing with clean water.

Outlook and Mode fabrics manufactured by Phifer Incorporated are lead free. These fabrics pass some of the most stringent US Standards for heavy metals such as US Product Safety Commission Section 101 and ANSI/WCMA A100. 1-2007 for lead content.

Outlook and Mode fabrics are manufactured using Dow Ecolibrium™ bio-based plasticisers. Dow Ecolibrium™ bio-based plasticisers offer a renewable alternative that is lead and phthalate free and lowers greenhouse gas emissions as much as 40%. With 98% of the plasticisers derived from non-fossil fuel based feed stock, Ecolibrium fabrics are a more sustainable option with the same superior performance and feel of existing Outlook and Mode fabrics.

A percentage of the proceeds of the sale of all Outlook and Mode fabrics will be donated to Melanoma Institute Australia. By choosing a fabric from this collection, you will be supporting melanoma research.

OUTLOOK MODE

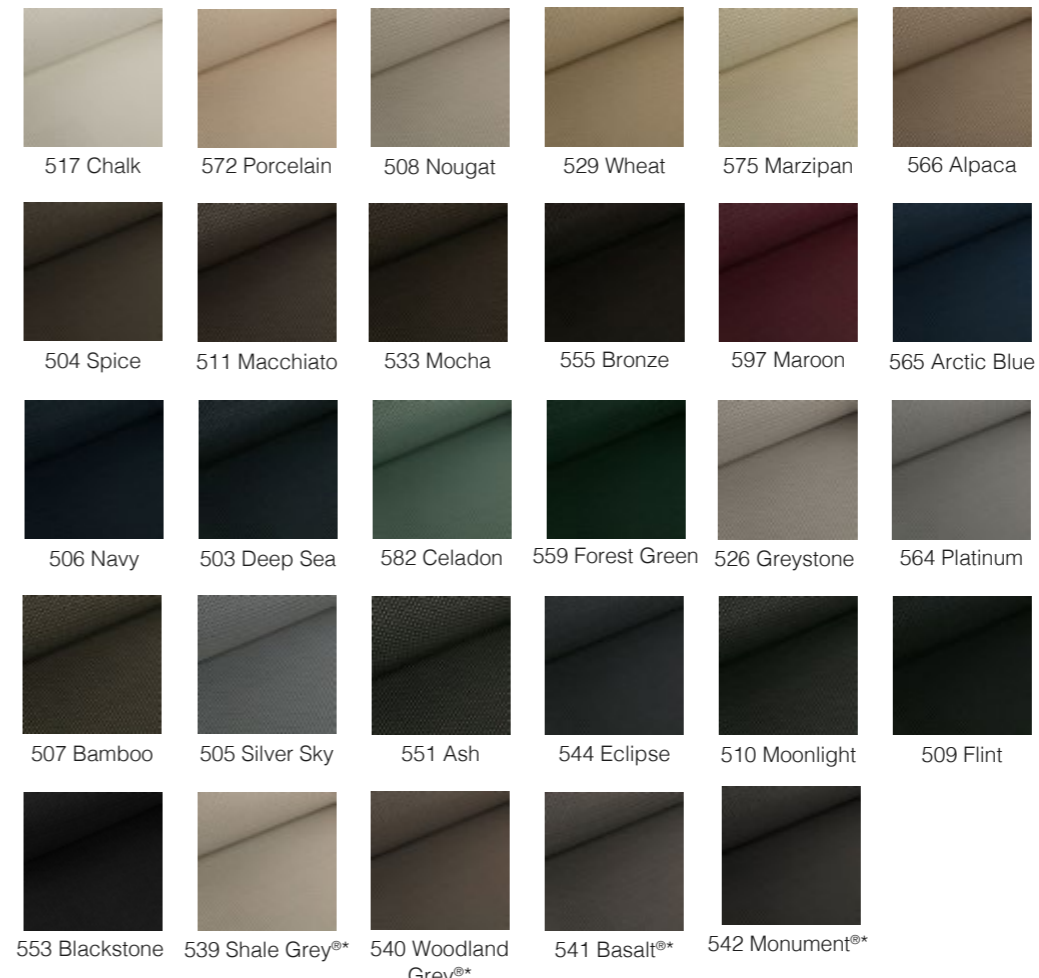

Outlook Mode fabrics will block and reflect up to 95% of solar energy while still allowing air to pass through, helping to create a cooler, more comfortable environment naturally.

FEATURES & BENEFITS

- Reduces solar heat gain
- Allows airflow
- Easy to clean
- 10 year warranty

APPLICATIONS

- Exterior blinds
- Awnings

Please be aware that slight colour difference between the screen/brochure and fabric may occur

AUSTRALIAN MADE CANVAS

WHY BARRINGTON?

Barrington fabrics combine classic Australian design with contemporary flair, creating a collection of fabrics that will provide shade perfection to any Australian domestic or commercial outdoor blind or awning project. These Australian made fabrics are designed for Australian endurance and when installed will support indoor climate control and energy savings.

BARRINGTON FABRICS:

- All colours available in 220cm width
- Reduce solar heat gain by over 95%
- Provide indoor climate control
- Low maintenance, durable and easy to clean
- Maximum colourfastness – resistant to fading
- Mould, mildew and stain resistant
- 100% Australian made Poly/Cotton Canvas
- Supported by a 10 year warranty
- Environmentally friendly - APEO and Solvent Free

The Barrington collection of Awning Canvas has been specially manufactured to achieve a highly durable, low maintenance, heat and sun blocking canvas. The Bio-UltraShield protective fabric coating system incorporates a double treatment antimicrobial process. This is achieved by firstly sanitising the woven natural canvas with a specially designed protective treatment to provide resistance against bacterial growth, mould and mildew. The outer coating is then applied to both sides of the pre-treated sanitised canvas. This colourful protective coating includes the highest quality colour pigments, UV stabilisers, as well as further protective antimicrobial treatments. The Bio-UltraShield fabric protective coating system ensures that your Barrington canvas awning will provide maximum colour vibrancy and protection against the elements for many years of service.

Barrington fabrics are as durable as they are stylish and are designed to handle high traffic applications with ease. These fabrics should be hosed regularly to remove dust, bird droppings and other solid particles and should not be rolled up or stowed away while wet.

Barrington fabrics are supported by a 10 year warranty. This covers changes in physical properties and is valid for 10 years from the date of purchase. Further details about this warranty are available by request from Ricky Richards (Sales) P/L.y choosing a fabric from this collection, you will be supporting melanoma research.

A percentage of the proceeds of the sale of all Barrington fabrics will be donated to Melanoma Institute Australia. By choosing a fabric from this collection, you will be supporting melanoma research.

BARRINGTON COLOURS

With 16 stylish colour options, consistently applied to the front and reverse sides, Barrington Colours creates a stylish, contemporary look to any block-out awning or blind application.

FEATURES & BENEFITS

- Reduce solar heat gain by over 95%
- Provide indoor climate control
- Low maintenance, durable and easy to clean
- Maximum colourfastness – resistant to fading
- Mold, mildew and stain resistant
- 100% Australian made poly/cotton canvas
- Environmentally friendly – APEO and solvent free
- Water resistant
- Bio-Ultrashield (UV Stabilised & Anti microbial treatment)
