

VERANDA SYSTEMS

Designed for both internal and external use on horizontal or inclined surfaces.

The Veranda system prevents rooms from heating up. A hard wearing construction and the highest quality fabrics guarantee durability. While the unique fabric tensioning system allows the covering of irregular shapes.

HIGH QUALITY AND FUNCTIONAL

DURABLE CONSTRUCTION

Engineered with the latest materials and technology ensuring high quality operation and performance to outlast.

VERSATILE

Designed for use on horizontal and inclines surfaces to reduce sunglare, control heat, provide UV protection, and privacy.

POWERED BY SOMFY™

Powered by Somfy™ trusted motors engineered to operate quietly and smoothly with ease.

FABRIC TENSIONING SYSTEM

The built-in fabric tensioning system inside the roller tube keeps fabric tight and allows for covering irregular shapes like triangles and trapeziums.

PROPERTIES

- Constructed from extruded aluminium
- Fabric tensioning
- Wide range of quality fabrics
- Sun, wind and rain protection
- Electric drive
- Installed on a surface at any angle
- Group installation
- Any RAL colour
- Optional extras:
Controls
Sensors
Home automation
