

MILLENNIUM

Superb craftsmanship on a grand scale

*“... We’ve got
our own sky.”*

MILLENNIUM is based on a self-supporting full cassette that sits flush with the wall and extends over patio and garden by up to a generous 7.5 metres in width. Choose your favourite colour from a host of awning fabrics and frames!

The MILLENNIUM is a durable, high-quality awning, elegantly styled and easy to operate, with refined technical features. With a single-unit width of up to 7,500mm, the MILLENNIUM is ideal for balconies and patios of any size. Give your patio or balcony a modern, individual look with one of our many awning fabrics and our large selection of framework colours.

FULL CASSETTE

With a height of just 160 mm and a depth of 249 mm (when the cassette is closed), the MILLENNIUM boasts an extremely compact design. The full cassette, which is closed on all sides, protects the awning against soiling and the effects of the weather.

Arm Bracket ▲

Sturdy arm brackets fitted with a support and high-impact screw guarantee a high level of stability against side winds when the awning is extended.

Spring Tension Arm ▲

Hinged arms with an extremely high spring tension ensure that the awning fabric remains taut.

Fabric Cover Shell ▲

the fabric cover shell offers an elegant solution for concealing the fabric roller.

• **System**

The MILLENNIUM is a durable, high quality awning that meets the highest demands:
